

Introduction to Terminal

My Terminal is a web based solution that allows mail order / telephone order (MOTO) merchants to manually process credit and debit card transactions. The secure solution turns a computer in to a credit card terminal. No installation, programming or software is required for this service. This is a great solution for call centres that require agents to accept payments over the phone.

My Terminal Overview

- Easy to use solution
- Process Manual Payments
- Send payment confirmation to clients
- Process payments anywhere with an internet connection
- Accept credit and debit card payments by phone/mail order
- Fully configurable Payment page including customizable fields.
